Software Engineering master’s students do NOT require an override for the following CSE courses:

The Software Engineering series:

- CSE 563  Software Requirements and Specification
- CSE 564  Software Design
- CSE 565  Software Verification, Validation, and Testing
- CSE 566  Software Project, Process, and Quality Management

Additionally, SER students **do not need an override** to register for the following courses:

- CSE 512  Distributed Database Systems
- CSE 545  Software Security
- CSE 546  Cloud Computing
- CSE 571  Artificial Intelligence
- CSE 572  Data Mining

**Note:** having permission to enroll in a course does NOT guarantee that you will be able to obtain a seat in it. These are very popular courses, and seats are limited.
