CSE courses for which Software Engineering MS students do not need an override

The series for required electives:

- CSE 563 Software Requirements and Spec (Fall only)
- CSE 564 Software Design (Spring only)
- CSE 565 Software Verif/Validation/Test (Fall only)
- CSE 566 Software Proj/Process/Qual Mgt (Spring only)

And the following courses:

- CSE 512 Distributed Database Systems
- CSE 545 Software Security
- CSE 546 Cloud Computing (Spring only)
- CSE 571 Artificial Intelligence (Fall only)
- CSE 572 Data Mining

All other CSE 500-level courses require an override.

Software Engineering students are not approved to take CSE 551.

Software Engineering students may not count CSE 400-level classes toward the 30 credit hours of study required for the MS degree.
